

Swing Automatic Door

By changing minimum space, this is suitable for the place that is needed efficient energy conservation and economic feasibility.

Single-Sliding Door	WS-S100
Double-Sliding Door	WS-S200

The automatic or manual swing door operator is special system for making entrance without obstacle at using the door. as operator that can be applied at existing swing door or new structure changing minimum space, this is suitable for the place that is needed efficient energy conservation and economic feasibility.

Specification

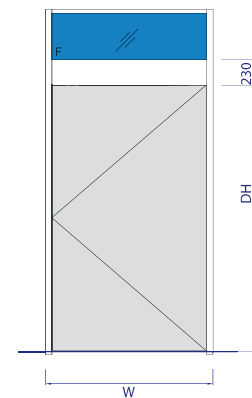

Model	WS-S100	WS-S200
Weight of the door	80kg	60kg × 2
Size	900mm	900mm × 2
Width of the door	450~1100mm	
Speed of the opening and shutting	200~600mm/sec Step adjustment	
Opening maintenance time	0~50sec(variable)	
Input voltage	AC 220V 50/60Hz	
Controlling type	Digital micro processor	
Power transmission	90W DC MOTOR timing belt driving	
Operating temp	-20 °C ~ +55 °C
